

# **Fractions in the Kitchen**

## **Pumpkin Treats**

**To go along with our fraction study, I'm asking each student to find a tasty, nut-free recipe to share with our class! Fractions are used in the kitchen ALL the time, and they are an excellent visual to help you understand how fractions are part of a whole. I have seen everything from pumpkin cheesecake to pumpkin bread!**

**Your recipe must use at least three fractions. You will be hand writing your recipe, so please make sure that your writing is legible and neat. Please sign up on our Shutterfly site to choose a day to bring your pumpkin treat into class, we would LOVE to try what you made in the kitchen!! Once I have everyone's recipes, we will be making them into a book for you all to have at home. Can't wait to see what you all make!**

- 1. Pick out a recipe with your parents help.**
- 2. Sign up for a date on Shutterfly.com (include your recipe title when signing up). If you signed up to bring a Friday Fun Snack in the month of October, please sign up to bring your pumpkin treat on that Friday.**
- 3. Make the pumpkin treat and write out your recipe on the sheet provided.**
- 4. Bring the treat to school.**
- 5. Tell the class a few of the measuring tools you used to make your treat while we project your recipe onto the board.**
- 6. Enjoy eating the treat with your class.**

**Have fun creating in the kitchen!**
